ABSTRACT

This seven-part factbook contains statistical data on the enrollments, graduates, programs, and financial status of New Mexico's 2-year colleges and vocational schools during 1980-81. Part I reviews spring, fall, and summer institutional headcount enrollment by college in academic, vocational, and community service programs. Part II looks at full-time equivalent enrollment in academic and vocational programs at each institution from 1976-77 through 1980-81. Part III provides preliminary data on enrollments, completions, and placements for active vocational programs in 1980-81 by college. Highlights of the "1980-81 Vocational-Technical Education Follow-Up Report for the Previous Year's Graduates and Completers" are reported in Part IV, including summary information on employment status, salaries, and taxes paid on earnings, and detailed data by program. Part V lists all associate degrees awarded at each of the 2-year colleges during 1980-81, showing the number of persons receiving degrees by type of degree and the percentage of total degrees awarded. Part VI indicates the number of persons who took the General Education Development (GED) test and those who passed it and received a GED certificate. The final section details institutional revenues, by source, and expenditures for instruction and general purposes. Each section contains brief explanatory comments and data tables. (KL)

Current Year Revenue and Expenditures	32

PREFACE

This addendum contains selected updated statistical data from the 1979-80 factbook. An attempt has been made to select information that is referred to most often by the users of the factbook.

Additional information on New Mexico two-year colleges and vocational institutions may be obtained by contacting the New Mexico Board of Educational Finance--Commission on Postsecondary Education, 1068 Cerrillos Road, Santa Fe, New Mexico 87503; Telephone (505) 827-2115.

Headcount Enrollment

The following table showing headcount enrollment for 1980-81 is new to the factbook this year. Although an attempt has been made to collect this information in past years, difficulties have been experienced in obtaining unduplicated figures and in distinguishing between academic and vocational students.

The data presented in this table are the most accurate that could be obtained for 1980-81. The staff of the Board of Educational Finance will continue to work with the institutions to try to develop standardized definitions and data collection procedures to improve the accuracy of the data. However, due to the differences in the institutions and the uncertainty of the intent of students, this will probably never be a completely accurate report.

The reader should avoid adding the numbers for Summer (1980), Fall (1981), and Spring (1981) to obtain a total headcount for the year. The figure obtained, if this is done, will be a duplicated number, (i.e., a student taking courses in each of the three terms would be counted three times).

Headcount Enrollment

	Fall 1980	459	0	1,267	1,726
	Spring 1981	437	0	1,148	1,585
State Totals	Summer 1980	3,698	8,138	1,927	13,763
	Fall 1980	9,354	13,635	8,889	31,608
	Spring 1981	9,584	14,265	13,295	37,144

These figures show the unduplicated headcount enrollment by term and by type of instruction. Totals cannot be calculated for the full year, since it would be a duplicated count (A student taking courses in the summer, fall, and spring terms would be counted three times).

Full-Time Equivalent Enrollment

The following table is devoted to a history of enrollment in the two-year institutions. It shows the number of full-time equivalent (FTE) students in academic and vocational programs in each of the institutions from 1976-77 through 1980-81. The number of full-time equivalent academic students is determined by taking the total number of credit hours generated at an institution during the year and dividing that number by thirty, the number of credit hours a full-time student is expected to take during one academic year.

Noncredit vocational full-time equivalent totals are obtained by using two formulas, one for full-time students and one for part-time students. Full-time equivalents for students who are taking a full-time program are calculated as follows:

$$\text{FTE} = \frac{\text{Number of full-time students} \times \text{Number of weeks of term for which enrolled}}{32}$$

For students enrolled in part-time vocational classes, the full-time equivalents formula is:

$$\text{FTE} = \frac{\text{Total weekly contact hours} \times \text{Number of weeks of term for which enrolled}}{736}$$

These enrollment figures are used by the Board of Educational Finance and Public School Finance Division of Department of Finance and Administration as one factor in determining equitable funding for the various institutions. The calculated FTE totals are used as the base for levying the local support tax of \$100 per academic FTE and \$400 per vocational FTE, and the \$325 per FTE state support at New Mexico Junior College. However, in all but two of the institutions (NMJC and NMMI), the major funding source is state appropriations.

Vocational Enrollments, Completions, and Placements

The following table displays enrollments, completions, and placements for active vocational programs for 1980-81. It should be pointed out that this is preliminary information. Complete follow-up data for 1980-81 will not be available until April, 1982. The accuracy and availability of information at the time of publication varied greatly from one institution to another. This is due in part to the different manner in which information is collected among institutions. However, primarily it is due to the fact that federal regulations require the Division of Vocational Education to allow a minimum number of days after a vocational program is completed before information is collected on the number of placements. Institutions follow this schedule closely and often do not have information on placement available until spring of each year.

Comparison of enrollment, completion, and placement data on any one program can be misleading for the following reasons:

(1) Some programs are more than a year long and a portion of the enrollments shown are not scheduled to finish until the following year.

(2) "Open entry" programs which allow students to enroll and begin classes anytime during the year, thus completing at different times throughout the year.

(3) A large number of students attend part-time and may not complete the program for several years.

(4) Students often accept employment before completing the training program which are considered placements, thus placement numbers can be higher than completions.

1980-81 Vocational-Technical Education Follow-Up Report for Previous Year's Graduates and Completers

The 1980-81 Vocational-Technical Education Follow-Up Report for the Previous Year's Graduates and Completers was carried out at all New Mexico area vocational schools and at the NMSU-Grants Branch. Tucumcari Area Vocational School did not yet have graduates. This information was provided by the New Mexico State Department of Education, Vocational Education Division.

Of the 2,600 vocational program completers, 323 (12%) were not available for placement; 2,134 (82%) were available for placement; and 143 (6%) could not be located or else did not respond.

Of the 323 completers not available for placement, over half, 177, continued their education while 146 did not enter the labor force for other reasons.

Of the 2,134 completers available for placement, 2,004 (94%) were employed and 130 (6%) were unemployed seeking work at the time followup was done.

Based on their average hourly earnings, these program completers will earn over 19 million dollars during their first year of employment, which represents an increase of 1 million dollars over the previous year. They will pay nearly 4 million dollars in taxes.

Highlights

	<u>Number</u>	<u>Percent</u>
Completers available for placement		
Employed in field trained or related field	1,826	86%
Other employment	178	8%
Unemployed seeking work	130	6%
	2,134	100%
Completers unavailable for placement		
Pursuing additional education	177	55%
Not in labor force for other reasons	146	45%
	323	100%
Status unknown	143	
Total number of vocational completers	2,600	
Estimated total first-year earnings	\$19,289,754	
Estimated taxes paid on earnings	\$ 3,915,820

Academic Programs

All but three of the institutions included on this document, ATVI, LVTI, and TAVS, offer academic credit programs and all of those offering academic credit offer associate of arts or associate of science degrees except Clovis Branch of ENMU. Although the classwork takes place at the Clovis campus, the degree is awarded by the parent institution in Portales.

All credit courses taken at branches of four-year institutions which are listed in the catalogue of the parent institution are transferable and automatically acceptable by the parent four-year institution. These courses are treated the same as if they were taken on the main campus. There are, however, courses offered at branches which are not listed in the parent institution's catalogue. The parent institution evaluates credits earned in these courses in the same manner that all outside transfer credits are evaluated. It should be noted that although state-wide articulation agreements exist for some specific subject areas, all credits earned in one New Mexico public postsecondary institution are not automatically transferable to another state institution.

The following table lists all of the associate degrees awarded at each of the two-year institutions during 1980-81. It shows the number of persons receiving degrees by type of degree and the percentage of the total awards. There were 785 degrees awarded at two-year colleges in New Mexico in 1980-81.

	Secretarial Administration	3 (15%)
		<u>20</u>
NMMI	Associate of Arts (general)	147 (100%)

Associate degrees are not offered by ATVI, Luna TVI, and Tucumcari.

General Education Development (GED)

The General Education Development Certificate is awarded to persons who are able to pass an examination indicating that they have attained a level of educational proficiency equal to a high school diploma. One of the responsibilities of a community college is to extend a second chance to individuals who had to drop out of high school before degree completion. The GED certificate coupled with adult basic education gives many people that second chance. Community colleges and secondary schools share these responsibilities (adult basic education and GED) in various ways in different communities throughout the state.

Of the 15 institutions covered in this factbook eight have adult basic education programs. Courses at the elementary and secondary level are offered which assist a person to attain a proficiency level that will enable them to function at a minimum level in reading, writing, math, English, etc. The adult basic education program also assists a person to perform well enough to pass the GED. Upon passing the GED exam, a student is awarded a high school equivalency diploma by the New Mexico Department of Education.

The GED test is offered at nine of the two-year institutions. The following table shows the number of persons who have taken the test and the number who have passed and been awarded a GED certificate.

General Education Development (GED)

State Totals	3,608	2,404

Current Year Revenue and Expenditures

The following table shows revenue by source for instruction and general purposes at the two-year schools for 1980-81. The revenues and sources of those revenues are totaled to give a picture of amounts of funds generated for the entire state in each of the categories. The percentage figures next to the state totals indicate a portion of total income, not total available funds.

Expenditures for 1980-81 for instruction and general purposes are shown on the next page by line item or category of expenditure. State totals at the bottom of the table also include a percentage figure that shows each line item as a percent of total expenditures.

All financial information included in this section is taken from Exhibit II of each institution's budget. All tuition revenues and instruction expenditures include community service funds.
